

Power-Lid 1400

Your Source For Heating Systems Technology

A SHORTCUT TO POWERFUL, LONG LIFE WITHOUT AGING.

Hi-Temp Products offers a tough furnace lid, providing temperatures up to 1300°C. Designed for on-line voltage, this innovative lid delivers efficiency right from the start by eliminating power supply requirements. Plus, Power-Lid 1400's lack of element aging pays big dividends long-term by allowing one-at-a-time element replacement. Simply install our lid and turn on the power. A great alternative to silicon carbide elements. This versatile lid design can be utilized in various casting, foundry and heat treating processes.

LET HI-TEMP BUILD ONE FOR YOU.

Hi-Temp custom builds power lids in all shapes and sizes for fast installation and replacement of any furnace surface vertical and horizontal. The coaxial ceramic support rods, combined with Kanthal's stable hi-temperature resistance materials, allow fast and easy replacement of individual elements. Slide out the support rod, replace the damaged element and your back in full production.

MOST IMPORTANT, POWER-LID 1400 DELIVERS INCREASED OUTPUT BY REDUCING CYCLE TIMES.

Ultimately, Hi-Temp furnace lids maximize furnace efficiency to new higher levels. To compare the advantages of Power-Block 1400 Heating Modules on an application specific basis, call the High Temp Products Team to receive technical support and analysis of how the Power-Lid 1400 can improve your application.
